TABLE OF CONTENTS

ACKNOWLEDGEMENT STUDY TEAM

	1
CHAPTER ONE	1
INTRODUCTION	1
1.1 Benefits of Intra-regional Trade Expansion	4
1.2 The Status of Economic Cooperation in South Asia	7
1.3 The Motivation for and Objectives of the Study	8
1.4 A Brief Survey of Literature	10
CHAPTER TWO	10
ANALYTICAL FRAMEWORK AND METHODOLOGY	10
2.1 Introduction	13
2.2 The Country Models	20
2.3 The Trade Link Among Country Models	21
CHAPTER THREE	21
ESTIMATION OF COUNTRY MODELS	21
3.1 Introduction	22
3.2 Estimation of Equations for Domestic Sectors	27
3.3 Estimation of Trade Blocks	30
3.4 Validation of the Model	32
CHAPTER FOUR	32
ESTIMATION OF INTEGRATED MODEL	32
4.1 Introduction	32
4.2 Estimation of Equations for Domestic Sectors	37
4.3 Estimation of Trade Blocks	40
CHAPTER FIVE	40
FORECASTING AND SIMULATION	40
5.1 Introduction	40
5.2 Forecasting for Bangladesh	41
5.3 Forecasting for India	42
5.4 Forecasting for Nepal	43
5.5 Forecasting for Pakistan	44
5.6 Forecasting for Sri Lanka	45
CHAPTER SIX	45
LIMITATION OF THE STUDY AND DIRECTION FOR FUTURE RESEARCH	45
Bibliography	
Annexes	
Annex I - Coding of Variables Used in the Report	
Annex II - Historic Simulation Graphs	
Annex III - Forecasting Simulation Graphs	
Annex IV - Country Model	
Annex V - Estimation of Integrated SAARC Model	
Annex VI - Historic Data Set of the SAARC Countries	

ACKNOWLEDGEMENT

The preparation of this study on macro-econometric modeling of South Asian economies would not have been possible without the generous support received from SANEI. We are grateful to the support and suggestions received from the Advisory Panel of SANEI. The title of this report has been changed after the comments received during the presentation of Preliminary Results of the First Draft. The present title is in accordance with the major objective of the study to analyze and understand the macroeconomic structure of the South Asian Economies with a common econometric framework in order to be able to compare and study their commonalities and differences as well as linkages, and also to create a data set with time series of common macroeconomic variable for all the five countries. This final draft of the report contains estimation of the Integrated Five country model and policy simulation based on this Integrated model. The previous draft contained estimation and simulation results only for the individual country models (estimated separately) with intra-SAARC trade subsector providing the trade link.

The study report was prepared by a team led by Kishor Kumar Guru-Gharana. Dr Vikash Raj Satyal and Mr Shankar Aryal were the other members of the core team. Their extremely arduous job of several months involved in data collection for about 4400 data values, verification and computer work in estimation, simulation and graphics is highly appreciated.

The study team expresses sincere gratitude towards Dr Mohan Man Sainju, Executive Chairman, IIDS, for his constant encouragement and support. Last but not the least, Mr Naba Raj Shrestha and Ms Jamuna Joshi earned our sincere appreciation for their hard work of typing this report under severe time constraint.

Dr. Kishor Kumar Guru-Gharana
Associate Professor of Economics
Tribhuvan University, Kathmandu
and

Research Consultant
